Software Engineer | React, Node.js, PostgreSQL | SCADA and Industrial Systems Background

Software Engineer with a degree in Systems Engineering and experience building and maintaining web applications using React, Redux Toolkit, Node.js, Express, PostgreSQL, MongoDB, and Docker. Worked across frontend and backend layers, including REST API development, database integration, SQL query optimization, technical documentation, and CI/CD-supported workflows. Additional experience in SCADA systems provides exposure to industrial monitoring, operational reliability, and real-time data environments.

PROFESSIONAL SUMMARY

SEIDOR Analytics

Software Engineer

Rosario, Argentina

Mar 2024 – Present Remote

- Full-stack development and maintenance of enterprise web applications using Node.js, Express, React, and Redux Toolkit.
- Designed REST APIs, integrated PostgreSQL and MongoDB databases, and created SQL stored procedures and optimized queries.
- Worked with Docker for containerized environments and participated in CI/CD processes for deployment and delivery.
- Produced clean, maintainable code following semantic versioning and Git workflows.
- Documented backend and frontend with JSDoc and Markdown.
- Applied modern AI application patterns including prompt engineering, few-shot prompting, specification-driven workflows (specs), MCP-based tool integration, and skills/tool orchestration.
- Coordinated tasks via Jira, ensuring alignment with business and technical goals

BLC Global

SCADA Engineer

Rosario, Argentina

Apr 2023 – Mar 2024

- Developed and maintained SCADA applications using Ignition for wind, solar, and biogas energy parks.
- Designed HMI/SCADA screens for real-time monitoring of field devices, substations, inverters, meteorological stations, and power generation assets.
- Configured and optimized alarm management systems, historical data collection, trend analysis dashboards, and operational reporting tools.
- Implemented automation and process improvements to enhance system performance, operator efficiency, and operational visibility.
- Collaborated with operations teams to identify monitoring requirements and translate business needs into SCADA solutions.

Gloouds

Frontend Web Developer

**Buenos Aires,
Argentina**

Jun 2022 – Apr 2023

- Developed UI components, layouts, and interfaces.
- Migrated state management from useContext to Redux.
- Integrated REST APIs and performed debugging and maintenance.

BLC Global
Operator COG

Rosario, Argentina
Nov 2019 – Jun 2022

- Performed 24/7 remote monitoring of wind, solar, and biogas energy parks through SCADA and telecommunications systems.
- Monitored the operational status of power generation assets, substations, communication networks, and field equipment to ensure continuous and reliable operation.
- Managed alarms and incidents, performing first-level analysis, troubleshooting, and escalation according to operational procedures.
- Coordinated with field technicians, maintenance teams, and customers to support incident resolution and minimize downtime.

Pronexo
Web Designer

Rosario, Argentina
Oct 2016 – Nov 2019

- Designed and developed websites using WordPress.
- Implemented UI/UX improvements for clients.

EDUCATION

UNIVERSIDAD ABIERTA INTERAMERICANA
Ingeniería en Sistemas Informáticos (Systems Engineering)

Rosario, Argentina
Dec 2025

ESCUELA SUPERIOR N°49
Systems Analyst

Rosario, Argentina
Dec 2016

SKILLS

- Software Development & AI Applications: JavaScript, React, Redux Toolkit, Node.js, Express, REST APIs, Python, Prompt Engineering, Few-shot Prompting, Specification-driven AI (Specs), MCP (Model Context Protocol), Skills/Tools Integration
- Databases: PostgreSQL, MySQL, MongoDB, SQL Query Development
- DevOps & Deployment: Docker, Docker Compose, Nginx, CI/CD
- Tools: Git, GitHub, Bitbucket, Jira, Postman, Insomnia, MkDocs, PlantUML
- Documentation & Engineering Practices: Technical Documentation, JSDoc, Markdown, System Analysis, Process Optimization
- Spanish - (Native)
- English – B2
- Italian – A1
